

2. Student Participation Rates Form

TIMSS School ID 9999

Province ON

(1) TIMSS Class ID	(2) Number of Students Present	(3) Number of Students Not Present	(4) Number of Students Present + Number of Students Not Present	(5) Participation Rate (%)	(6) Makeup session	
				$\frac{\text{students present}}{\text{students present} + \text{students not present}} \times 100$	6.A.	6.B.
Record the TIMSS Class ID of each selected class.	Refer to the Student Tracking Form. Record the total number of students in the class who were present during one or more parts of the test, indicated by participation codes "P" or "SA".	Record the total number of students in the class who were absent "A" or not participating due to parental refusal "R". Do <u>not</u> include students who have permanently left the school "N/A" or are learning remotely on a permanent basis "L".	Total the numbers in columns 2 and 3.	Divide the number from column 2 by the number in column 4; then multiply the result by 100.	If the student participation rate for the class was below 90%: A. Add a check mark in column 6.A. to indicate that a makeup session was organized. B. Record the total number of students who participated in the makeup session in column 6.B.

					<input type="checkbox"/>	
					<input type="checkbox"/>	
					<input type="checkbox"/>	

If the student participation rate for any of the selected classes is less than 90%, then a makeup session is required. Even if holding a makeup session at the school will not increase the student participation rate to 90%, the makeup session should nevertheless be held to increase the rate as much as possible. If the low student participation rate is due solely to students being absent because of parent/guardian refusal, then a makeup session would not be possible and is not required.

If a makeup session is organized, only students who are listed on the Student Tracking Form may participate in the test. No substitution of students is permitted.
